## EXECUTIVE SUMMARY

---

Aspiring Data Analyst with a B.Tech in Information Technology, skilled in SQL, Power BI, Excel, and Power Query. Cleaned and transformed raw data to uncover a 26.5% churn rate responsible for \$3M in revenue loss out of \$16M across 7,043 customer records. Moved into retail analytics, examining 9,994 orders to surface \$2.3M in revenue patterns and pinpoint \$213K in avoidable losses through discount impact analysis. Designed star schema data models and built KPI dashboards in Power BI to turn findings into clear business insights for decision-making.

## EDUCATION

---

B.Tech in Information Technology | CGPA: 7.71 Nov 2021 – Sep 2025  
Misrimal Navajee Munoth Jain Engineering College, Anna University

## SKILLS

---

- Databases & Query Languages: SQL, MySQL
- Data Visualization & Reporting: Microsoft Power BI (Desktop & Service), DAX, Microsoft Excel (Pivot Tables, VLOOKUP, XLOOKUP, SUMIFS, COUNTIFS, Conditional Formatting), KPI Dashboard Development
- Data Processing & ETL: Microsoft Power Query, ETL Processes, Data Modeling, Star Schema
- Analytical Techniques: Data Cleaning, Data Validation, Descriptive Analysis, Exploratory Data Analysis (EDA), Trend Analysis, Metric Definition
- In-Progress: Python(Pandas, Matplotlib)

## PROJECTS

---

### Telco Customer Churn Analysis | Independent Project Dec 2025 – Jan 2026

*Tech Stack: SQL (MySQL), Power BI, Power Query, Microsoft Excel*

<https://github.com/rishikesavan-data/Telco-Customer-Churn-Analysis>

- Uncovered a 26.5% customer churn rate and \$3M in lost revenue by analyzing 7,043 customer records — applying data cleaning, validation, and descriptive analysis in SQL and Power Query to surface business insights.
- Built a Star Schema data model with fact and dimension tables to structure the dataset for efficient querying and reporting, improving scalability of future analysis.
- Designed an interactive Power BI dashboard with KPI metrics and pivot-style breakdowns to visualize churn drivers, including month-to-month contracts (42.7%) and electronic check payments (45.3%), to support business decision-making.

### Superstore Sales Performance Analysis | Independent Project Nov 2025 – Dec 2025

*Tech Stack: SQL (MySQL), Power BI, Power Query, Microsoft Excel*

<https://github.com/rishikesavan-data/Superstore-Sales-Performance-Analysis>

- Analyzed 9,994 retail orders across 4 years using SQL and Excel pivot tables to perform data preprocessing and sales performance analysis — surfacing \$2.3M in revenue and \$286K in profit.
- Identified \$213K in avoidable losses by aggregating discount and return-rate metrics at different intervals, highlighting anomalies driven by over-discounting and high return rates.
- Automated a Power BI reporting dashboard covering sales trends, regional performance, and category-level metrics, replacing manual spreadsheet reporting for business decision-making.

## CERTIFICATIONS

---

- Deloitte Australia Data Analytics Job Simulation — Forage Jan 2026
- Certificate Course on Data Analytics — Infosys Foundation & ICT Academy Aug 2024 – Sep 2024
